

How to Update Year Heads

Updating your Year Heads every Academic Year

Written by Sanket Haval | Last published at: July 23, 2024

Managing Access & Permissions settings is an annual house-keeping task that should be reviewed and updated as necessary at the beginning of each academic year. Particular attention should be paid to Year Heads as they are more likely to change each year.

The Parent Note should also be updated before the start of each Academic Year as well. See more on this below.

[Updating the Parent Note Setup](#)

1. Go to **Access & Permissions** on your **Dashboard**

2. Under the **Type** column, you should see the years listed as **1-6**. You will need to edit each of them to the correct Year Heads email address

- **Click** on the **Edit** button located in the far right column

3. The **Title** should be *First Year Head* or *Second Year Head* etc. *(or similar)*

4. The **Type** is not editable. This is the **Year** assigned to this particular **Year Head**

5. The **Classes** can be **all selected** or if there are multiple Year Heads per year, you can **assign per class**

6. **Module Access** - The only areas here that need to be looked at are the **Absentee, Leave Permission and Late Form**

- Each of the above areas can have an **Individual Email** sent per submitted note
- Parent sends in a **Late Form** and the assigned **Year Head** will receive an email
- **Approval Access** - This can be checked so that the Year Head can **approve** Permission to Leave notes

7. **Email** - This is where we assign the **Year Head** via the email address they use to login to the **Dashboard & Administrator's App**

- It should be the **school email address**, not a personal one.

8. **Click here to add more Email Addresses** - You can add multiple users' email addresses if there is **more than one** staff member assigned to a single year.

9. **Click on Submit**

This is how your final list of Year Heads should look:
