

Cloud Cam – Secure Photo Capture

Capture Images Securely. Store in the Cloud. Share When Ready.

Written by Sanket Haval | Last published at: February 18, 2026

Cloud Cam allows staff to take photos of students and school-related activities **without storing images on personal devices**.

- All images are:
 - Stored securely in the school's cloud
 - Accessible internally by staff only
- Not visible to parents until shared via:
 - News
 - Notifications
 - Galleries

This protects student data and ensures media is not spread across multiple personal devices.

Capturing Images Using Cloud Cam

1. Open Cloud Cam

Open the **Administrators App** and log in.

- On **Android devices**:
 - Open the left-side menu (☰)
 - Tap **Cloud Cam**
- On **Apple devices**:
 - Tap **Cloud Cam** from the bottom menu

You will now see all previously uploaded Cloud Cam images.

Click Image to Enlarge

2. Capture a New Image

- Tap the **Camera icon** (bottom right)
- Take your photo(s)

3. Finish Capturing

When finished:

- Tap the **check icon**

Click Image to Enlarge

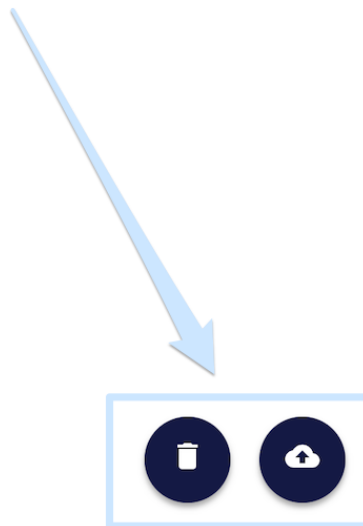

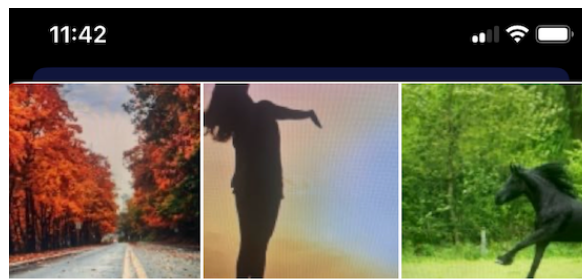

4. Sync or Delete

You will now be asked to:

- **SYNC** – Upload images to the school cloud
- **DELETE** – Remove unwanted images

Important

You must tap **SYNC** for any image you want to keep or use later.

Click Image to Enlarge

Once uploaded, images can be used in:

- News
- Notifications
- Personal Notifications
- Galleries
- Other communications

Uploading an Image from Your Device

In some cases, staff may need to upload an image from their device.

Examples:

- Edited images for events (e.g. Bake Sale Poster)
- Previously taken on another device or already stored in phone gallery

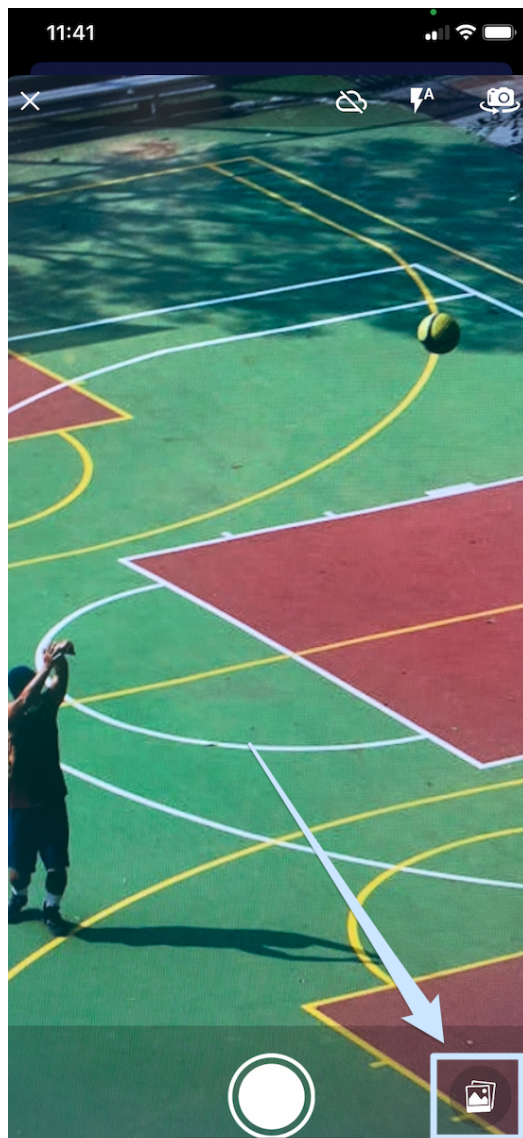

Important Guidelines

- Any images of students or staff should always be captured directly using Cloud Cam
- Uploading from your device should only be done when necessary
- If using images found online, ensure they are **royalty free**
- The school is liable for copyright infringement

Step-by-step Guide:

1. Open **Cloud Cam** in the Administrators App
2. Tap the **Camera icon** (bottom right)
3. Tap the **Gallery icon**
4. Select the image(s) from your device
5. Tap **Done**

The image will now be available in the Cloud Cam Video library.

Organising the Cloud Cam

Cloud Cam is available to all staff internally.

This means:

- All uploaded images are visible to staff
- Images are not visible to parents unless published via News or other methods
- Organisation is essential to avoid clutter

Best Practice: Use Folders

We strongly recommend organising images using folders.

You can organise by:

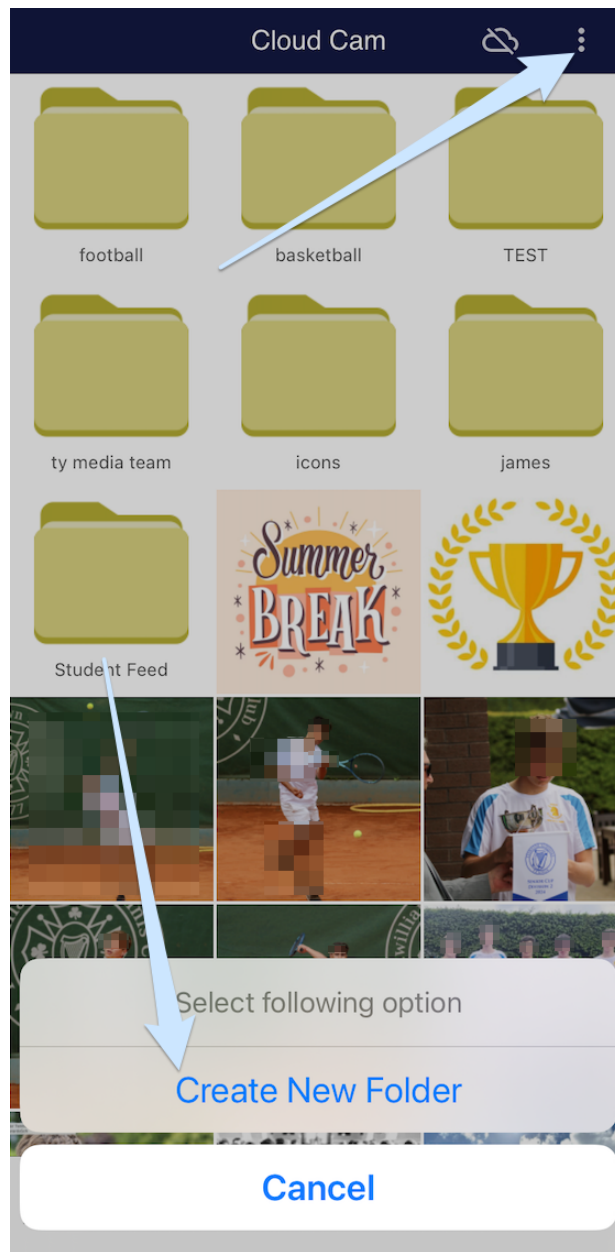

- Put your name on your folder
- Year group
- Event
- Department

Good folder organisation makes it much easier to:

- Find images later
- Keep content separated
- Maintain a clean system

How to Create a New Folder

1. Open **Cloud Cam**
2. Tap the **three dots** (top right)
3. Select **Create New Folder**
4. Enter the folder name
5. Tap **Create**

Click Image to Enlarge

Sharing Your Image

After uploading, you can share the image(s) via:

- News
- Notifications
- Social Media
