

# Access & Setup

## Set Up Notification Preferences, Time Slots, & Reasons

Written by Sam Support | Last published at: February 18, 2026

---

This guide explains how to access the Detention Manager within the Unique Schools system and complete the essential first-time setup.

### Before you can:

- [Create detention sessions](#)
- [Add students to detention](#)
- [Send Personal Notifications to parents](#)
- [Track and manage detention records](#)

You must first set up your **Detention Time Slots** and **Detention Reasons**.

These settings form the foundation of the Detention Manager and ensure your school has a clear, consistent structure in place. Once configured, staff can efficiently assign students, manage sessions, and communicate with parents directly through the app.

Completing this initial setup is a required first step before using the Detention Manager functionality.

## Accessing Detention

1. Go to [www.uniqueschoolapp.ie](http://www.uniqueschoolapp.ie) and log into the **Dashboard**.

2. Click on the **Detention Manager**

**Note:** If you do not see the **Detention Manager**, please contact [staffsupport@uniqueschools.ie](mailto:staffsupport@uniqueschools.ie).

## Choosing Notification Preferences

1. In the **Detention Manager**, click the **Settings** icon (top right corner).

2. Under **Notifications**, enable or disable the following:

- **Automatic Personal Notifications:** When a student is added or removed from Detention, the parent will receive a Notification Alert. This includes the reason and note if you added one. Adding a student directly from the Late list will auto-add Late as the reason.
- **Manual Personal Notifications:** Enabling this allows staff to send Notifications to parents in relation to the attendance of the student within the Mark Attendance section of the session.

|  | Assigned | Present |
|--|----------|---------|
|  | 0        | 0       |
|  | 0        | 0       |
|  | 0        | 0       |
|  | 0        | 0       |
|  | 0        | 0       |

## Notification Settings

Configure notification preferences for detention-related communications

**Automatic Personal Notifications**  
Automatically notify parents whenever a student is added to or updated in detention.

☒

**Enable manual Personal Notifications**  
Allow sending custom or templated attendance notifications directly from a detention.

☒

## Adding Time Slots

1. In the **Detention Manager**, click the **Settings** icon (top right corner).

2. Under the **Time Slots** section:

- Enter the **Time Slot name** you wish to create.
- Enter the **time range** for the detention.

Time Slot Name: *Lunch Time*

Time Range: *12:30pm – 1:00pm*

5. Click **Add Time Slot**.

To delete a Time Slot, click the **Bin** icon beside the one you wish to remove.

## Adding Detention Reasons

1. In the **Detention Manager**, click the **Settings** icon (top right corner).
2. Click on the **Reasons** tab.

3. Enter the **Name of the Reason** and click **Add Reason**.

Examples: *Late, Uniform, Behaviour, etc.*

You can enter a **description** that will be visible to the parent.

This description can be added either:

- When creating the session, or
- When adding the student to the session

As the reason for detention may vary from student to student, we recommend adding the description **at the time you assign the student to detention**.

This ensures the information is accurate, specific, and relevant to that particular incident.

To delete a Reason, click the **Bin** icon beside the one you wish to remove.
