

Cloud Cam on your Dashboard

Manage & upload images to the Cloud Cam

Written by Sanket Haval | Last published at: August 08, 2024

The Cloud Cam allows you to capture images via the Administrator's App and then you can manage the images via the Web version of the system.

Add Images

1. From your **Dashboard**, go to **Cloud Cam**
 2. Click on the **Upload** button
 3. Select the image(s) you wish to **Upload**
 4. Click on the **Open/Upload** button
-

Adding images from the Dashboard via uploading from your device should only be done in specific circumstances.

All images added to the Cloud Cam should be uploaded directly from the Administrator's App via the inbuilt Camera. Images in your Cloud Cam will not be visible to parents/students until included on a notification or a gallery.

Create Folders

1. From your **Dashboard**, go to **Cloud Cam**
 2. Click on the **Create Folder** button
 3. Input a **Folder Name**
 4. Click on **Create Folder**
-

Using folders is a great way to organise images for easy access. Some examples of how folders can make life easier. Schools can **Create folder per:**

- Staff member and name it after themselves, e.g **Mr McManus**
- Year and/or class group
- Event, e.g **Ski Trip**
- Team, e.g **Basketball Team**

Add Images to Folders

1. From your **Dashboard**, go to **Cloud Cam**
 2. **Hover** over the image(s) you wish to add to a **Folder**
 3. **Click** on the **Tick Icon** in the top left of the image
 4. Continue to do this on all the images you want to add to a folder
 5. **Click** on the **Add Images to Folder** button
 6. **Select** the **Folder** you wish to add the images to
 7. **Click** on **Add Images**
-

Deleting Images

1. From your **Dashboard**, go to **Cloud Cam**
 2. **Hover** over the image(s) you wish to add to a **Delete**
 3. **Click** on the **Tick Icon** in the top left of the image
 4. Continue to do this on all the images you want to delete **or** use the **Select All** button if you wish to choose all images
 5. **Click** on the **Delete** button
 6. **Click** on **OK** to delete the selected images or **Cancel** to abort
-

Pinning Images

1. From your **Dashboard**, go to **Cloud Cam**
 2. **Hover** over the image(s) you wish to add to a **Pin**
 3. **Click** on the **Tick Icon** in the top left of the image
 4. **Click** on the **Pin** button
- Follow the same steps above but use the **Un Pin** button to remove the image from the pinned section
-

Pinning images allows you pin images at the top of the list. They will show first, after the folders. For images that are used regularly, this can be useful.
