

First-Time Setup Guide

Getting Started: Your First Step

Written by Sam Support | Last published at: February 16, 2026

This guide covers the **first and most important step** when setting up Team Manager. Before creating teams, fixtures, or training sessions, schools must assign **Full Access** to the appropriate staff member (usually a Head Coach, Sports Coordinator, or member of senior leadership) so they can configure the system correctly.

Once this is done, the Head Coach (or nominated staff member) can complete the **initial system setup** by adding venues, fixture types, and choosing visibility and notification preferences.

Understanding Access Levels

Team Manager has **two levels of access**:

1. Standard Access (Default)

By default, **all staff members** have access to Team Manager. This allows them to:

- View teams
- View fixtures and training sessions
- View basic team information

2. Full Access (Settings Access)

Full Access unlocks the **Settings** area in Team Manager. This is required for anyone responsible for managing the structure of the system.

With Full Access, users can:

- Create and manage **Venues**
- Create and manage **Fixture Types** (e.g. Friendly, League, Cup Match)
- Control **Notification settings**
- Enable or disable **Team Sheet visibility for parents**
- Typically, Full Access is given to:
 - Principals
 - Deputy Principals
 - Admin staff
 - Head Coaches

- Sports Coordinators
-

How to Assign Full Access

Only Principals, Deputy Principals, and Admin staff can assign Full Access.

To do this:

- Go to **uniqueschoolapp.ie** and log in
- Navigate to **Access & Permissions**
- Click **Add**
- Enter a **Title** of your choosing ("**Team Manager**" or "**Coaches**")
- Choose **Type: Team Manager**
- Add the email address of the staff member(s) you want to give Full Access to

⚠ **Important:** The staff member must already be registered on the School App before they can be added.

Initial Setup (For Head Coaches / Full Access Users)

Once Full Access has been assigned, the nominated staff member can complete the initial Team Manager setup.

Step-by-Step Setup

- Go to **uniqueschoolapp.ie** and log in
- Click **Team Manager** (second tile from the left, near the bottom of the screen)
- Click **Settings**
- Add your **Home Venues**
- Add your **Fixture Types** (e.g. Friendly, Cup Match, League)
- Choose whether you want **Notifications enabled**
 - This allows messages to be sent to parents, students, and staff
 - Useful for updates, cancellations, and reminders
 - Recommended: **Leave this turned ON**
- Choose whether parents can **see the Team Sheet** in the app

What to Do Next

Once your initial setup is complete, you're ready to:

- Create your first Sport
- Create your first Team
- Add students
- Schedule fixtures
- Add training sessions
- Start communicating with parents and students

The next guide will cover:
