

Creating News in the Administrators App

Share Positive Stories with the Whole School Community

Written by Sanket Haval | Last published at: February 18, 2026

The **Administrators App** allows you to post both **News** and **Notifications**.

When Should You Use News?

A **News item** should highlight positive events and achievements, such as:

- Bake sales
- Charity events
- Sports results
- Awards
- School trips
- Student achievements

These are “nice to know” PR-style posts designed to promote the school positively.

Important

- **News and Notifications are public feeds**
- Any parent, guardian, or student registered on the app can view them
- These are not private messages

If you need to send a message that is only visible to a specific individual or group, you must use **Personal Notifications** instead.

Personal Notifications are:

- Private
- Targeted
- Only visible to selected recipients
- Not available in the Administrators App
- Accessible via uniqueschoolapp.ie (mobile responsive)

[Learn more about Personal Notifications here](#)

Step-by-Step: Creating News

1. Open the Administrators App

- Log in to the app.
-

2. Go to News

- On **Android devices**:
 - Tap the 3 horizontal lines (top left)
 - Select **News**
 - On **Apple devices**:
 - Tap **News** from the bottom menu
-

3. Tap the Plus Icon

- Tap the **+ icon** (bottom right) to create a new News item.
-

4. Add Title & Message

- Enter your **Title**
- Enter your **Message content**

Remember: This will be visible to all registered app users.

5. Send as Push Notification (Optional Alert)

You can choose to alert specific users with a “beep” notification.

Important

The News item will still be visible to everyone
The alert only controls who receives the ping.

To select who gets alerted:

- Tap the **Filter/Funnel icon** (top right)
- Select **User Type** (e.g. Parent)
- Select the relevant **Year(s)**
- Tap **Save**

Example: To alert parents of 1st Years:

- User Type: Parent
- Year: 1

If you untick “Send as Push Notification”:

- No one receives an alert
 - The News item still appears in the feed
-

6. Add to Category (Optional)

- Tap the **Category dropdown**
- Choose the appropriate category (e.g. Sports, Trips, PTA)
- Categories help organise the News feed.

[Learn more about Categories here](#)

7. Schedule (Optional)

Tap **Schedule Notification** and select:

- Future Date
 - Time
-

8. Archive Date (Optional)

- Tap **Archive Date** to choose when the News item should be removed.
 - If no date is selected, the item automatically archives after **60 days**.
-

9. Add Images & PDFs (Optional)

Tap the **Paperclip/Attachment icon** (top right).

You can:

- Select images or videos from **Cloud Cam**
- Upload a PDF from your device

[Learn more about Media here](#)

Images

- If no image is selected, the school crest will appear by default.
 - We strongly recommend adding a relevant image to improve engagement as this appears in the alert on the parents lock screen.
-

PDFs

- Use PDFs only when necessary.
 - PDFs are designed for printable format and can be difficult to read on mobile devices.
 - Best practice:
Copy and paste the content into the message field instead.
-

10. Post to Social Media & Website (Optional)

You can also post directly to:

- Facebook
- X (Twitter)
- Instagram
- Website

If these options are not showing, please contact staffsupport@uniqueschools.ie

11. Tap Send

- Tap the **Send icon** (bottom right) to publish the News item.
-

Important Reminder

News = Public

Notifications = Public

Personal Notifications = Private & Targeted

If you need to send a message that only a specific group or individual should see, use Personal Notifications instead.

uniqueschoolapp.ie is accessible via mobile so you can send a Personal Notification from your phone through the browser.
