

Approve Permission to Leave (PTL)

Viewing, Approving & Managing Student Leave Requests

Written by Sam Support | Last published at: February 19, 2026

The **Permission to Leave (PTL)** section within **Attendance Overview** allows you to easily view, approve, edit, and manage student leave requests submitted by parents through the app.

This area ensures accurate tracking of when students are expected to leave, when they actually sign out, and whether approval has been granted.

Important

Students **must be signed out** using the **Digital Sign In/Out Device** or by a staff member in the office.

Signing out through **Unique Schools** ensures accurate time stamps and proper parental confirmation and updates.

Directly updating VSware/Tyro with sign-out information is **not recommended**.

Approval alone does not record the departure — the student must physically sign out.

How to Access PTL

1. Go to **uniqueschoolapp.ie** and log in.
2. From the Main Dashboard, click **Attendance Overview**.
3. Select the **PTL (Permission to Leave)** tab.

By Default:

- You will see **Pending PTLs for today**.
- To view other dates:
 - Use the **Date Filter** at the top of the page.
- To view **non-Pending PTLs**:
 - Use the **Status Filter** (It will be set to **Pending** by default)

What You Can See (Based on Role)

Access depends on your permissions:

- **Year Heads / Tutors** – See only assigned year groups.
- **Principal, Deputy Principal, Attendance Officer, Office Staff** – See all students.

Approving PTL Notes

Approve Individually

1. Tick the checkbox beside the student's name.
2. Click **Approve** on the right-hand side.
3. The student can now sign out using the Digital Sign Out Device.

Approve in Bulk

1. Scroll to ensure all PTLs have fully loaded.
2. Click the top checkbox beside the Student column to select all.
3. If prompted (for more than 10 notes), confirm the selection.
4. Click **Approve**.
5. All selected students will then be permitted to sign out.

Best Practice

Approve PTLs promptly to avoid delays at sign-out.

Always ensure students physically sign out via the Digital Sign Out Device.

Use the filters to manage large volumes efficiently.

Review cumulative PTL days where needed.
