

News Categories

Learn how to create news categories for efficiently organising your news

Written by Sanket Haval | Last published at: July 11, 2024

The News feed can be split into sub-categories e.g. Sports, Events, General etc. to display only relevant content in each category. Some schools like to sub-categorise each year so parents and guardians can easily see what's relevant to their student.

Adding a News Category

1. From your **Dashboard**, Click **News** on the left side menu
2. Go to **News Categories**
3. Click **Add**
4. Under the **News Category** field, add the **Title**
5. Choose the **Sort Order**
 - **Sort Order** applies to where the category will display across the top of the feed
 - If 1st Year is 7 in the Sort Order and 2nd Year is 6, 1st Year will display before 2nd Year
6. **Submit**

Once submitted, Categories can be applied to News. [Learn more about News](#)
