How to create a form template

Written by Sanket Haval | Last published at: July 19, 2024

Form templates are an excellent feature to assist staff when creating forms that are used multiple times. You create a template, and when needed you simply apply the template and adjust any changes to it.

To create a form template please follow the steps below:

Go to your **Dashboard** and tap on **Forms** then in the dropdown select **Templates**

Tap on **Add** on the top right of the screen

Enter the **title** of the form i.e. CCTV Policy

Enter **form content** i.e. description of Policy

Add as many **questions** as needed

Multiple choice: you will give options for answers and the user will be able to select only one answer

Checkbox: You will give options for answers and the user will be able to select multiple answers

Short answer: You will ask a question and user will be able to free type their answer

Enable Comment: User will be able to free type a comment in addition to their answer

Comment mandatory: User will not be able to submit the form if not entering a comment

Add Option: Where you can write the answers you expect from users i.e. Yes or No

Preview: You can view how the form will work for users and test answers to ensure you are happy before submitting

Submit

Note: After a template is created you can edit the template by tapping on the paper icon on the right corner of the screen. Make changes as needed and Submit.

Publish

If you have a template that is not published you can make it visible for users to use the template by Publishing. Simply **select the template** that is unpublished and tap on **Publish** at the top right of the screen. Note that this does not make visible for users on the app side but for users on the Dashboard/ Forms.

Unpublished

If you have a template that is currently not to be used you can unpublish until further notice. Simply **select the template** that is published and tap on **Unpublish** at the top right of the screen. Note that this does not Unpublished any forms that are visible on the app side which was created based on this template but only for users on Dashboard/Forms.

Delete

If you have a template that is not to be used anymore you can delete it by simply **selecting template** form and tapping **Delete**.
