

Add new students to existing Form

After creating a form, you can add more students to it

Written by Sanket Haval | Last published at: July 19, 2024

When creating a form you may select a specific year group to submit the form allowing them to submit their responses first, then open the form to other year groups afterwards. The system allows you to simply add students to an existing form, this way you don't need to create a new form.

To add students to existing forms please follow the steps below:

Go to your **Dashboard** and tap on **Forms** then in the dropdown select Manage Forms

Find the form you wish to add more students and tap on the **eye icon** (far right column)

Tap on **Add Users** on the right corner of the screen

Filter by the dropdown menu

Groups: If you have created a group previously you can find by the name of the group

Students: Will show list of year/class where you can select the ones relevant to you

Family Type: You can select year/class and then apply family type filter

Select **all** or select **relevant students** that you wish to submit the form to

Note: You will only see students who are not yet added to the existing form

Add selected so they move to your Final list

Select final settings on your form (if applicable)

Submit
