

1. Initial Video Setup

Enable Video Uploads in the School App (Vimeo Integration)

Written by Sam Support | Last published at: February 18, 2026

What This Does

To use the video functionality within the Unique Schools system, your school must have a **Vimeo account** connected.

Once integrated, you will be able to:

- Upload videos directly via uniqueschoolapp.ie
- Upload via the **Administrators App**

Share videos instantly to:

- The School App
- Your School Website
- Social Media
- Avoid uploading the same video multiple times to different platforms

Everything can be managed in one place.

Step 1: Create a Vimeo Account

If your school does not already have one:

- Go to <https://vimeo.com>
 - Create an account
 - Choose a plan that suits your storage and privacy needs
 - If you already have an account, simply log in.
-

Step 2: Create a Vimeo App

- Go to <https://developer.vimeo.com>
- Click **Create an App**
- Add a title and description
- Save the app
- Your app will now appear in your Vimeo Developer Dashboard.

Step 3: Generate API Credentials

From your Vimeo App settings, you will need:

- **Client ID**
- **Client Secret**
- **Access Token**

When generating the Access Token, ensure the following permissions are selected:

- public
- private
- upload
- edit

These permissions allow the system to securely upload and manage videos.

Step 4: Set Up Your Root Folder

- Go to <https://vimeo.com/home>
- Click **Library**
- Create a new folder (this will be your school's main video folder)
- Open the folder and check the URL

Example URL format:

<https://vimeo.com/user/12345678/folder/87654321>

You will need:

Root User ID (the number after `user/`)

Root Folder ID (the number after `folder/`)

What You Need to Send to Us

Once you have gathered everything, please email the following details to:

staffsupport@uniqueschools.ie

If you have any issues with the steps outlined, please contact us.

Required Information:

- Client ID
- Client Secret
- Access Token

- Root User ID
- Root Folder ID

Once we receive these details, we will complete the integration for you.

Important Note

To use **video uploads within the Unique Schools system**, your school must have a **paid Vimeo account** — the free plan does *not* support the level of video storage, privacy controls, and upload flexibility needed for integration.

Paid plans give you significantly more storage, advanced privacy settings, and the ability to manage and embed videos reliably across platforms, which the free tier does not provide.

Why a Paid Vimeo Plan Is Required

Free accounts have **very limited storage and features** that are insufficient for school use.

A paid plan ensures you get enough space and advanced controls for **high-quality video uploads, privacy settings, and embedding** — all essential for school communications.

The integration with the Unique Schools system requires API access and storage capacity that *only paid plans support*.

Standard Paid Plan Pricing

Vimeo's Standard plan is **€19/month** (billed annually).

This entry-level plan provides significantly more storage and upload capacity than the free tier, and allows for third party integration.
