

Add Students to Existing Payments

How to add more students to an existing payment

Written by Sanket Haval | Last published at: October 16, 2025

After creating a payment you may need to add more students to it. This is used for situations like transfer students coming in throughout the year and they might need to pay fees. You can simply add them to an existing fee payment rather than setting up a new item.

To add a student please follow the steps below:

1. Go to your **Dashboard** and under **Payments**, select **Manage Payment Items**
2. **Tap** on the **eye icon** of payment you wish to **add** the student to it
3. **Tap** on **View Students**
4. **Tap** on **Add Students**
5. **Filter** by the dropdown menu
 - **Groups:** If you have created a group previously you can find it by the name of the group
 - **Students:** Will show a list of years/classes where you can select the ones relevant to you
 - **Family Type:** You can select year/class and then apply family type filter
6. **Select all** or **select relevant** users that you wish to add to the payment
7. **Add Selected** so they move to your Final list
8. Hit **Submit**

If you cannot find a student on the list it could mean they are already added to the payment, or the payment setup does not allow the student to be added.
