

Re-adding a Parent Who Has Opted Out of Payment

How to re-add a parent who has opted out of a payment accidentally

Written by Sanket Haval | Last published at: July 19, 2024

When creating a Shop item you can decide to allow parents to Opt Out of a fee. Please only give this option if the fee is optional.

If Opt Out has been selected, parents/guardians will be able to Opt Out. This way they don't receive reminders and you as the school know how many payments are in fact still outstanding.

Some parents/guardians however might tap on Opt out by mistake so that you can add the parent back to the payment.

To add parent/guardian back to payment please follow the steps below:

Go to your **Dashboard** and tap on **School Shop** then in the dropdown select **Manage School Items**

Tap on the **eye icon** of payment you wish to delete the student from

Tap on **View Students**

Find the **student** and **tap** on the **Opt-Out** button

Confirm that you wish to update the Status

The parent should now be able to see the item on their school app account and make the payment in the **Shop** section.

If they still cannot see the fee on their side please check if there is a Last Payment Date set for the specific payment.

If after that, they cannot see it in their app, please have them contact our **Parent/Guardian support inbox**:
