

Searching for a Personal Notification

Quickly Find Any Message Sent via Personal Notifications

Written by Sam Support | Last published at: February 17, 2026

This guide explains how to search, filter, and export Personal Notifications from your Dashboard.

You can search from:

- The main Personal Notifications screen
- A specific Student Profile

Method 1: Search from Manage Personal Notifications

This is the best option if you are unsure of the student name or need to filter by date, status, or creator.

Step 1: Go to Manage Personal Notifications

- Log in to uniqueschoolapp.ie
 - Go to **Personal Notifications** under **Communications**
 - Select **Manage Personal Notifications**
-

Step 2: Use the Search Bar

You can search by:

- **Title**
 - **Student Name**
 - **Created By**
-

Step 3: Use Filters (Optional)

Filters help narrow your results.

- **Date**
 - Default: Today
 - Adjust to search previous dates

- **Created By**
 - Change to view PNs created by you or other staff
 - **Visibility**
 - View your **Private PNs**
 - View all **Public PNs**
 - **Type**
 - Default: Staff-created PNs & Replies to Notes from Parents
 - You can also view **System Generated PNs** (e.g., Late Sign In notifications)
 - **Status**
 - **Published** – Live in the app
 - **Scheduled** – Set to publish at a future date
 - **Archived** – Still visible in the Archived section of the app
 - **Pending** – Awaiting approval from a full access user
 - **Draft** – Started but not sent (auto-saved)
-

Step 4: Export (Optional)

- Click the **Export** button (top right)
 - Download results for reporting or record keeping
-
-

Method 2: Search via Student Profile

If you already know the student's name, this is often quicker.

Step 1

- Go to **Dashboard**
- Search for the student using the top-right search bar

Step 2

- Open the student profile
- Go to **Personal Notifications**

Here you will see:

- All communications sent to that student/family

- Delivery status
- Read status
- Full message history

This is especially useful when:

- A parent says they didn't receive a message
 - You need to confirm if something was read
 - You want a full communication history in one place
-
