

Add a Payment Item

How to add a new Payment

Written by Sanket Haval | Last published at: March 18, 2026

Creating Payment items can be done via the Dashboard and then viewed in the Dashboard and Administrator's App if you have been assigned to view it. Any payments should be created via Unique Schools in order to keep everything in one place for Accounts personnel and make it as easy as possible for the parent/guardian to pay. Shop items include Registration fees, School trips, Voluntary Contributions, Locker fees, Administration fess and anything else the school might take payments for. Cash can be recorded via the Unique Schools system, however it should be avoided.

Shop items can only be created by Full access users.

if you believe you should have access, please request Senior Leadership or Admin staff to add you or **[Contact our Support](#)**

To create a shop Item please follow the steps below:

1. Go to your **Dashboard** and under **Payments** then in select **Manage Payment items**
2. Click on **Add**
3. **Select user** to pay for item (e.g. Teacher/Parent)
4. Enter **Name** of fee
5. Enter **Account Code**
6. Select **Financial Year**
7. Enter **Description**
8. Select **Item Type** (See below for more details)
9. Tick **One Per Family** (if applicable)
10. Enter **Limit Orders** (if applicable)
11. Enter **Cost**
12. Select **Last Payment Date** (if applicable)
13. Choose **Files/Image**
14. **Filter by** the dropdown menu
 - **Groups:** If you have created a group previously you can find it by the name of the group
 - **Students:** Will show a list of years/class where you can select the ones relevant to you
 - **Family Type:** You can choose year/class and then apply family type filter
15. **Apply Filter**
16. **Select all** or **select relevant students** that you wish to submit the payment to

17. **Add selected** so they move to your Final list
 18. **Select name of the teacher** who will manage payment so they can view it on their **Administrators app**
 19. Select **Reminders**
 20. Untick **Send SMS** (if not applicable)
 21. Tick **Optout** (if applicable)
 22. **Require Consent** (if applicable)
 23. Hit **Submit**
-

Account Code

Extremely important to set up payment with the correct account code so that when managing your end-of-the-month reconciliation fees are assigned to the correct account code. You can find the account code on your Account Package system (e.g. 3310 assigned to all TY activities). We cannot change an account code after users pay for the item.

Financial Year

This will flag payments to which year they are relevant. So you may receive payments for 2024/2025 during the year 2023/2024. We recommend using the correct account code and Financial year rather than entering the 2105 code.

Item Type

- **Ad-hoc Payment** - Parents will be able to pay the total cost in their own time. They can make multiple payments until the total cost is covered.
- **Standard Payment** - Use this for all regular app payments. The charge is assigned to each student selected. If you tick "One Per Family", it will only apply once per family (not to every child).
- **Variable Amount** - Lets parents/guardians type in the amount they want to pay. Only to be used for voluntary contributions or donations.
- **Variable Quantity** - Lets parents/guardians choose how many items they want. Best for things like concert tickets, bus tickets, or other items that can be bought in multiples.
- **Open Payment** - Creates a payment link that can be shared outside the app with anyone (e.g. the wider community, external participants, past pupils). Ideal for payments such as fundraisers, enrolment fees, or events open to the public. This should not be used for regular school parents or staff who simply have not downloaded the app yet.

If you are ever unsure of what item type to select

One per family

This setting will assign the payment to only one student per family, based on the mobile number of the parent. So if

as a family they only need to pay once, please **do** tick the box.

Limit Orders To

Not a mandatory field. Only apply this if you have a limited amount of payments that can be accepted (e.g. Trip to Emerald Park with only 20 spaces available). Payments outside the school app do not count towards limited numbers.

Payment Type

This can be updated at any time. If you have given an instalment option and wish to change to full payment, it will not affect instalments for parents who have already paid.

- **Full Payment** - User will only be able to pay in full
- **Partial Payment** - User can either pay in full or in instalments. You decide how many instalments users will be paying. ***Instalments are taken the first payment is taken immediately, second and subsequent payments are taken in 30 days intervals.***

Last date of Submission

This means users will not be able to pay for the item after the date selected here. You can update the last date of Submission after creating the payment. You can leave a payment open by not selecting a last payment date.

Reminders

Please note that the setting will change depending on how soon you need the payment by (i.e. I am sending payment for a Trip the following week I might select reminders to go every 2 days). Reminders will only notify users who have not yet paid for the item, and users will receive reminders until the last submission date.

Optout

If you have an optional payment you can give parents the option to Optout. This way parents will not be getting reminders of the payment if they do not wish to pay for it. (i.e. Tickets to Musical) Do not give the Optout option if the payment is mandatory (i.e. School fees).

Require Consent

Not a mandatory field. Allows you to link consent with payment as the parent will not be able to make the payment if not consenting. Enter in the Consent Description to what they are consenting to.
