

# Capture & Upload Videos

Record at Events. Upload Securely. Share When Ready.

Written by Sam Support | Last published at: February 18, 2026

---

The **Administrators App** allows you to take photos and videos directly within the app and store them securely in the school's cloud.

This means:

- Media is **not saved on your personal device**
- Content is securely stored in the school cloud
- All staff can access the shared internal media library
- You can upload while at events and post later
- Or post immediately via **News or Notifications**

This ensures student data is protected and not stored across multiple staff devices.

---

## Important Before You Begin

If the **Video tab** is blurred or unavailable, you must complete the [Vimeo integration here first](#).

---

## Step-by-Step: Uploading Videos via the Administrators App

---

### 1. Open the App

- Open the **Administrators App**
  - Log in
- 

### 2. Open Cloud Cam

- On **Apple devices**:

- Tap **Cloud Cam** from the bottom menu
  - On **Android devices**:
    - Open the sidebar menu (☰ top left)
    - Tap **Cloud Cam**
- 

## 3. Select Videos

At the top of the screen, tap **Videos**.

You will now see:

- Existing videos
- Existing folders

**Note:** These videos are **internal only** until shared via:

- News
- Notifications
- Social Media

This is your internal school media library.

## 4. Create Folders (Recommended)

Tap the **three dots (top right)** to create a new folder.

- Best practice:
  - Create a folder with your name
- Or organise by:
  - Academic Year
  - Year Group

- Sports
- Trips
- Events

This keeps your media organised and easy to find later.

---

## 5. Record a New Video

To record:

- Tap the **Video icon** (bottom left)
- Tap the **circle button** to start recording
- Tap again to stop

You can record multiple videos in one session.

**Tip:** If you open a specific folder first, any video recorded will automatically be saved into that folder.

---

## 6. Review Your Videos

- When finished recording:
    - Tap the **check icon** (bottom right)
  - You can:
    - Tap a video to preview it
    - Long press a video to select it
  - If needed:
    - Tap the **bin icon** to delete unwanted videos
- 

## 7. Upload to the School Cloud

When ready:

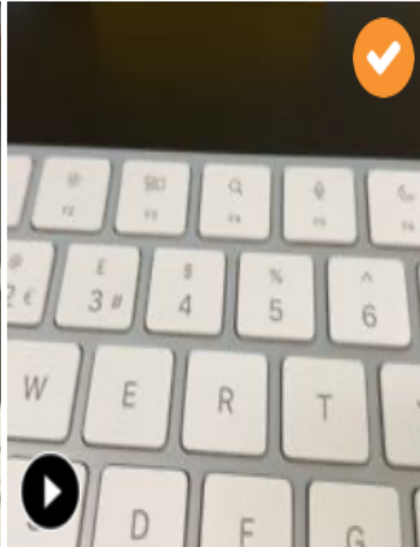

- Long press to select the video(s)
- Tap the **cloud icon** to upload

Videos may take a few minutes to upload depending on size and connection.  
Once uploaded, they are securely stored in the school's internal cloud library.

08:34

Long-press a video to select it.

---

## Uploading a Video from Your Device

In some cases, staff may need to upload an image from their device.

Examples:

- Edited Videos for events (e.g. Concert Advert)

- Previously taken on another device or already stored in phone gallery

## Important Guidelines

- Any Videos of students or staff should always be captured directly using Cloud Cam/Video
- Uploading from your device should only be done when necessary
- If using videos found online, ensure they are **royalty free**
- The school is liable for copyright infringement

### Step-by-step Guide:

1. Open **Cloud Cam** in the Administrators App
2. Tap on the Video option
3. Tap the **Video icon** (bottom right)
4. Tap the **Gallery icon**
5. Select the video(s) from your device
6. Tap **Done**

The video will now be available in the Cloud Cam Video library.

---

## Sharing Your Video

After uploading, you can share the video via:

- News
- Notifications
- Social Media

See full guide here to share via:
