

Search and View Student Profiles

Written by Sam Support | Last published at: February 17, 2026

The Student Profile provides staff with a centralised, detailed view of all attendance-related information and parent communications for each student. This makes it easy to manage and track individual attendance records, notes, Personal Notifications, requests throughout the academic year and more.

Key Features of the Student Profile

1. Parent/Guardian Contact Details:

Displays all contact numbers associated with the parents or guardians of the student. This allows staff to quickly access contact information if needed for communication purposes. You can also see if the parents/students are app users via the icons beside the name/contact number.

2. Date Range Filtering:

By default, the profile shows all attendance data from the start of the academic year. You can change the date range via the option located beside the “Summary” heading to view attendance for a specific period.

3. Summary Overview:

The summary provides an at-a-glance breakdown of:

- Total explained and unexplained absences.
- Total Permission to Leave (PTL) requests.
- Total Parent Notes submitted and acknowledged by the school.

This summary helps staff quickly assess the student’s attendance status and identify any unresolved items.

4. All Attendance:

Calendar View: This displays the calendar view of absences, lates and permission to leaves based on your attendance system. Unique Schools matches the calendar shown on the attendance system (VSWare/Tyro) so you're seeing the same data in both places.

List View:

All individual attendance records are displayed under this section, including:

- **Absent Notes:** Notes submitted to explain a student’s absence.
- **Late Notes:** Notes detailing when a student arrives late and the reason.
- **Permission to Leave (PTL) Notes:** Records of PTL requests from parents, indicating when and why a student left school early.

Each record is timestamped and categorised to ensure easy reference and follow-up.

5. Please Checks:

If parents submit a Please Check request (e.g., if they believe the student is marked absent in error), it will be listed in this section. It’s crucial for staff to review and action these requests promptly to ensure accurate attendance records. You can abort a Please Check if you do not wish to notify the parent by clicking the Edit option on the far right and changing the status to “Aborted”.

6. Notes from Parents:

This section displays any non-attendance-related notes submitted by parents. Examples include notes about dress code exceptions, medical issues, or other relevant updates. These notes are separate from attendance records but are still important for school staff to acknowledge and monitor.

7. Personal Notifications:

You can view all Personal Notifications sent to the parents/guardians here making it very easy to track and see if the parent read the messages. You can also send individual Personal Notifications to a family by using the Send PN option at the top right side of the Student Profile.

Benefits of the Student Profile Page

The Student Profile page offers staff a complete overview of individual student attendance and communication, streamlining the process of reviewing and managing student records. It also helps ensure transparency and consistency in parent communications and attendance tracking.

How to Access the Student Profile

To access a student's profile:

1. Search via the Main Dashboard or in the Attendance Overview.
2. Use the search bar to find the student by name.
3. Select the student's name to view their complete profile.

With this tool, managing attendance and parent communications becomes more efficient, ensuring accurate records and improved engagement between the school and parents.
